TripMe - Casablanca

Running the application

Run the command nodemon tokens/server.js (from the root directory of the project).

Open the file index.html with LiveServer.

Navigating the application

In the main page you can either register to the website or login as a registered user.

Through the entire application you can view all the points of interest available in our website in the "Our points of interest" tab.

As a registered user you can also get in the Favorites section inside the "Our points of interest" tab. In the favorites section you can manage your trip by viewing all the points that are relevant to you (saving them by clicking the heart icon by each point) and then you can update your saved points of interest in the database by clicking the suitcase icon. Also, it is possible to rearrange the points that you saved in the favorites page to suit your needs for planning the best trip to Casablanca!

Anytime you can navigate to home page by clicking the "Home" tab.

There is also an About tab where you can see details about the city.
